Comments: The CKD-EPI equation was used to calculate the estimated GFR, and is not adjusted for extreme body surface area. The CKD-EPI equation has not been validated for children less than 18 years, pregnant women, ethnic groups other than Caucasians or African Americans, or the elderly. Estimated GFR is valid only in steady state conditions. Ref: Levey AS, Stevens LA et al. A new Equation to Estimate Glomerular Filtration Rate. Ann Intern Med. 2009; 150:604-612.
